

Course Outline PPF

Overview

We guide our students through an education process that is both intellectual and hands-on. Our comprehensive curriculum covers topics ranging from the inner workings of our DAP software to the latest, most innovative installation techniques for paint and headlamp protection film. Students receive the personal attention that will enable them to gain the skills necessary to provide quality, trouble-free installations on even the most challenging of vehicles. We also provide complete instruction on the use of the Design Access Program software and associated hardware.

We use a combination of in person classroom style lessons on product knowledge, best practices, and installation tips & tricks along with plenty of hands-on practical application. To ensure the best experience for our students we allow a maximum of 5 students per class

Students who pass the course will be issued a Certificate of Successful Completion of the course and Exam

Standard Course \$1,500.00/Student

Syllabus (32.5 Hours)

Day 1 - 5 Hours

Paint Protection Film Best Practices - Lesson
Installation Tips & Tricks - Lesson
Practical Installation – Practical Application

Day 2 - 7.5 Hours

Installation of Hoods, Fenders, & Mirrors – Lesson & Practical Application
